

Keara Pereira - Software Developer

pereirakeara@gmail.com

Profile

Prior to software engineering, I was a veterinarian where I led with expertise and qualities such as effective communication, teamwork, and dedication. Seeking a position in the challenging world of Software where my passion for understanding and developing new technologies will be put to the test.

My motto in life is "Nothing is impossible, the word itself says I am possible".

- Api integration
- Disqus
- Mongoose
- Python
- NodeJs
- Express
- Django
- Netlify
- JQuery
- Sass
- Bootstrap
- Material UI
- PostgreSQL
- Heroku
- Google Authentication

Experience

GENERAL ASSEMBLY - WASHINGTON DC

- Full time Software Developer - completed 12 weeks, 720 hours full stack immersive in a remote setting.
- I learnt the latest front- and back-end programming languages, tools like : HTML, CSS, SASS, Javascript, jQuery, PostgreSQL, MongoDB, Mongoose, React, Django, Node.js, Express, Material UI, Bootstrap, Materialise, Markdown.
- Designed and built interactive and fully responsive frontend web applications with HTML, CSS, Javascript, React, third-party API integrations, and additional libraries
- Developed full-stack applications and designed REST APIs with full CRUD functionality using React, Javascript.

GOA ANIMAL WELFARE TRUST

- Full time Pet practitioner, Surgeon and consultant.
- Helped in management of the hospital and specialized in treatment of cats, dogs, birds, goats, cows, horses.
- Worked as a Surgeon and did and assisted on numerous surgeries like sterilization, foreign body removal, tumor removal, caesarean sections, amputations, fractures.

- Helped save a dog who was mauled by a tiger.
- Conducted vaccination camps in other hospitals and wrote three articles on animal diseases.
- Have experience in communication and management.

Projects

1. Battle of the Superheroes

I designed and built an interactive and fully responsive frontend card game based on logic with HTML, CSS, Bootstrap, third-party API integrations, and additional libraries.

2. Piece of Cake

Piece of Cake is a recipe manager application where users can create an account and add recipes.

I build it using Node/Express/MongoDb, Full CRUD data operations are displayed. And the CSS is done using SASS which I installed locally.

3. Lights Out

Lights out is a website for a user to browse from a list of movies to choose for movie night. It also allows the user to write reviews on a movie.

I built a full stack single page hosted on Heroku and I implemented the MERN-stack technologies. It also has full CRUD applications and authentication features.
